REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Applicant recites a track system comprised of a carrier defining a track surface for a vehicle and further comprised of connecting elements that extend downward from the track surface and connect to a compensation sleeper. The carrier and sleeper are mounted on, and supported by, a bed forming a foundation for the track system. Adjustment mechanisms are installed on the compensation sleeper and adjust the spacing of the carrier relative to the bed as well as adjust the spacing of the carrier relative to the compensation sleeper.

The prior art made of record does not adequately disclose the features of the instant invention. Specifically, the prior art of Reichel et al (US 2005/0166786) discloses an upper carrier mounted on a foundation bed. An adjustment mechanism is positioned at the lower end of the feet of the carrier and adjusts the position of the carrier relative to the bed. However, Reichel et al does not show an adjustment mechanism to move the carrier relative to a compensation sleeper. Reichel et al shows a sleeper mounted between the downwardly extending legs of the carrier and the sleeper is permanently mounted and cannot be adjust as stated above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
